TWO KINGDOMS. ONE LITTLE BATTLEFIELD.

Guan Yu

I command **Shu: blue, first to move.** You command Wei: orange, second.

9 × 9 · PLAY INSIDE THE SQUARES

The white castle at E5 stays forever.

蜀 40	魏 40
blue castles	orange castles

I can use that white castle as a wall too. **Neither of us owns it!**

Cao Cao

Win immediately by capturing an enemy group. Otherwise, two consecutive passes end the battle and you count enclosed empty land.

ONE TURN. ONE CHOICE.

I choose **one empty square**, then deploy one castle. On a phone, tap a square and press Deploy.

Cao Cao

1

DEPLOY

One castle inside one legal empty square. Tap the same selected square twice for quick deployment.

OR

2

PASS

Place nothing. The other player takes their turn.

Guan Yu

A castle stays where I put it. **I cannot move or remove it.** When all 40 are deployed, I can still pass.

Occupied squares, the neutral castle, enemy sealed territory and illegal self-captures cannot be chosen.

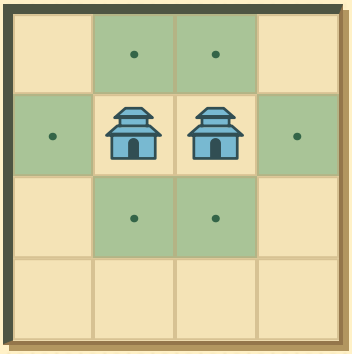

CASTLES NEED BREATHING ROOM.

Guan Yu

An empty square directly **up, down, left or right** is a liberty-a little breathing space.

BOARD CROP · ABCD / 9-6

These two connected Shu castles share six empty neighboring squares.

Side-by-side castles of the same color form a **connected group**. They share all their liberties. Diagonal castles do not connect.

Cao Cao

Count the whole group. A castle with no personal empty neighbor is still alive if another castle in its connected group has a liberty.

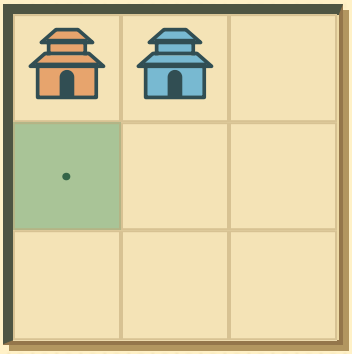

ONE CAPTURE ENDS THE BATTLE!

Guan Yu

That orange corner castle has just one liberty left: **A8**. I can place there to capture it.

BOARD CROP · ABC / 9–7

Wei at A9 is surrounded by the top/left board edges and Shu at B9.
A8 is its final liberty.

If my **connected group has no liberties**, you capture it-and win immediately. You do not need to capture every castle!

Cao Cao

Sudden death: a winning capture ends the game before any territory score is compared. There is no capture-and-recapture phase.

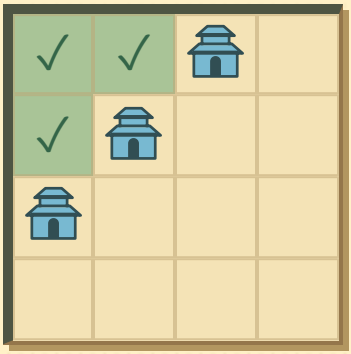

CLOSE THE GATES. CLAIM THE LAND.

Guan Yu

I claim empty land when every route out is blocked by **my castles, board edges or the white castle**.

BOARD CROP · ABCD / 9-6

Shu's diagonal wall and two real board edges seal three empty corner squares.

I cannot use your castles as my walls. A piece placed inside **before the gates close** can stop that area becoming your territory.

Cao Cao

The open field touching all four board edges is not territory. Follow empty squares only up/down/left/right; empty diagonal contact does not open a route.

The central white castle can complete a wall. It never joins your connected castle group.

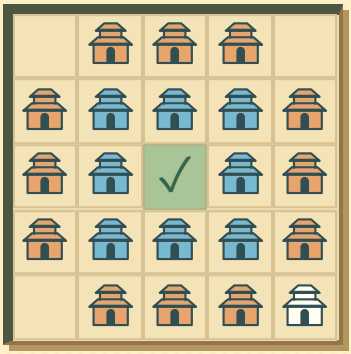

ONE TINY EYE CAN KEEP ME SAFE.

Guan Yu

My last liberty is this **one empty square at C7**. It is sealed Shu territory, so it is protected!

BOARD CROP · ABCDE / 9-5

The blue ring's only liberty is C7. Orange cannot enter this sealed square, even to claim a capture.

No! **The sealed-territory ban comes first.** I cannot fill your eye and then claim I captured you.

Cao Cao

A protected eye is safe in this game. A raw count of "one liberty" does not mean danger when the opponent is legally barred from that square.

This is the sealed-territory rule of this game. Do not import ordinary Go's one-eye capture rule here.

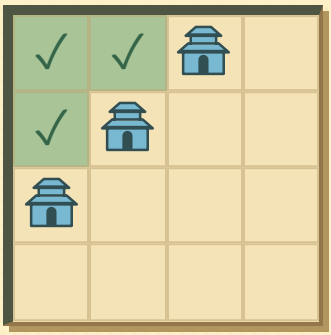

SIZE DOES NOT DECIDE PROTECTION.

Cao Cao

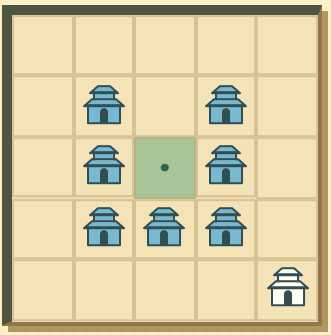

Does a bigger empty area let me invade? **No–if it is fully sealed, it is still off limits.**

BOARD CROP · ABCD / 9–6

CLOSED: all three highlighted squares belong to Shu.

BOARD CROP · ABCDE / 9–5

OPEN: the missing blue castle at C8 leaves a route out of the center.

Guan Yu

One square or ten: **fully sealed empty territory cannot be invaded.** A gap or an enemy inside makes a different situation.

> The important question is “Is this valid sealed territory?”–not “How many empty squares are inside?”

AN ENEMY WAS ALREADY INSIDE!

Cao Cao

I placed my orange castle **before your wall was complete**. Now the space touches both kingdoms.

BOARD CROP · ABCD / 9-6

Shu's wall surrounds a corner, but Wei already occupies A9. The remaining empty space is contested.

Guan Yu

I cannot claim that empty region as sealed Shu territory. **You may play legal moves inside it.**

An apparently enclosed area is not your territory if its empty region touches enemy castles. If an enemy group loses all liberties, the game ends immediately; you do not clear the pieces and continue.

NO SELF-CAPTURES. CHECK THE EXCEPTION.

I cannot place a castle that leaves my connected group with **zero liberties**-unless the move also captures an enemy.

Cao Cao

BOARD CROP · ABCD / 9-6

Orange A9-A8 has only A7 left. Orange at A7 would leave its own group with zero liberties and capture nothing.

Guan Yu

If a legal move leaves **both colors with zero liberties**, our chosen simultaneous rule breaks only Blue. **Wei wins.**

A capture exception can bypass the self-capture restriction. It **cannot** bypass the ban on entering enemy sealed territory.

This app uses your specified simultaneous-capture rule: Wei wins, whoever placed the final castle.

TWO PASSES? COUNT EMPTY LAND.

Guan Yu

One pass is not the end. **Two passes in a row** end the battle. A castle deployment between passes resets the count.

Shu passes → **Wei passes** → **Count land**

Count empty squares inside valid enclosed territories.
Castles and the white neutral castle are worth no territory points.

Shu 7 · Wei 3

Shu: 7 − 2 = 5. Lead: 5 − 3 = 2.

WEI WINS · adjusted lead is below 3

Shu 8 · Wei 3

Shu: 8 − 2 = 6. Lead: 6 − 3 = 3.

SHU WINS · adjusted lead reaches 3

First subtract **2 from Shu**, then Shu must lead me by **at least 3**. Every smaller margin, including a tie, is mine.

Cao Cao

Your chosen scoring variant: Shu needs **5 more raw territory** than Wei. This app follows the scoring you confirmed.

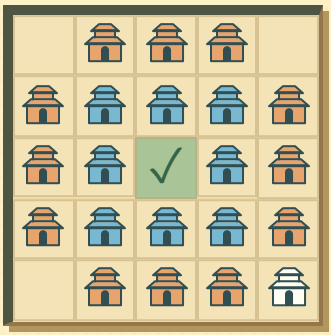

READ THE SIGNS, COMMANDER.

Guan Yu

A **green check** marks a group with a protected sealed liberty. A **red !** means the opponent has a legal winning capture.

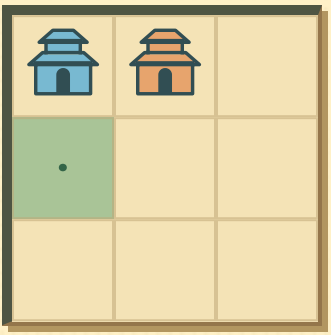

BOARD CROP · ABCDE / 9-5

SAFE: C7 is a protected eye. One liberty, no legal enemy entry.

✓ PROTECTED

BOARD CROP · ABC / 9-7

DANGER: Wei can legally play A8 and capture Shu at A9.

A green check protects **that group**, not every castle in your army. I can still attack another exposed group!

Cao Cao

Keep your eye empty. Filling your own territory removes points and may remove its protection. Filling your last liberty without a capture is illegal.

Turn Land and Danger hints on or off below the board. A missing red marker is not a promise against a multi-turn trap-plan ahead.

YOU ARE READY TO COMMAND.

Guan Yu

My plan: **build, breathe, seal, and watch every group.** A tiny protected eye can save a kingdom!

YOUR TURN

Deploy one legal castle or pass. Blue starts. Forty castles each.

YOUR SAFETY

Groups connect sideways, never diagonally. Their empty neighbors are shared liberties.

YOUR TERRITORY

Fully sealed empty land is off limits to the enemy, at any size. Edges and the white castle help.

YOUR VICTORY

One enemy capture wins immediately. Otherwise, pass/pass counts land. Shu needs 5 more raw territory.

Challenge an AI from levels 1-10, share one device in **Pass & play**, or create an **Online duel** and send a friend the six-character room code.

Cao Cao

Choose your avatar in Generals. Finished eligible battles earn device-local XP. Undo works in ongoing AI/local battles; online moves cannot be undone. Resigning awards victory to the other player.

Little Kingdoms fan-game comic guide. Uses your supplied territory rules, confirmed scoring variant and Wei-wins simultaneous rule. References: Great Kingdom overview · Publisher's first-edition rulebook listing. This guide is written for this app; it is not the publisher's rulebook.
